WWW.MEGSS.NET

Cost is \$850.00 per student
This includes all books and
exam fees.

- Classes are taught by a certified ASSE 6050 Medical Gas Instructor.
- Classes are proctored through NITC (National Inspection Testing Certification). This allows the student to obtain a certification that is internationally recognized.
- Classes are kept to a maximum of twenty students so we can work with everyone to help ensure they get the best instruction and are well prepared for testing.
- Closed enrollment classes for individual companies is possible with at least ten students.

The ASSE Medical Gas Installer class is a requirement for any individual who installs medical gas piping (i.e. Oxygen, Medical Air, Nitrous Oxide...etc.) in a healthcare environment. This includes all levels of medical facilities from hospitals to dental offices. Topics that will be covered in this class include a general knowledge of applicable codes, proper installation methods, identification of system components, and correct installation testing. This is a 32-hour course that is taught over four days and includes both a written and practical exam on the last day. The practical exam will consist of properly brazing two joints of a horizontal coupling and two up-flow joints of a vertical coupling. The Braze coupons will be examined by an American Welding Society (AWS) certified welding inspector to ASME Section IX brazing performance qualification standards. Student must have a minimum of four years documented practical experience in the installation of piping.
