OFFICE OR DOWNLOAD
THE APPLICATION ON OUR
WEBSITE AT
WWW.MEGSS.NET

Cost is \$875.00 per student
This includes all books and
exam fees.

- Classes are taught by a certified ASSE 6050 Medical Gas Instructor.
- Classes are proctored through NITC (National Inspection Testing Certification). This allows the student to obtain a certification that is internationally recognized.
- Classes are kept to a maximum of twenty students so we can work with everyone to help ensure they get the best instruction and are well prepared for testing.
- Closed enrollment classes for individual companies is possible with at least ten students.

The ASSE/6040 Medical Pipeline Maintenance Person Course is a 32-hour training session specifically designed for individuals who have the responsibility of maintaining their facility's medical pipeline systems. This course covers the different technologies and applications of the components that make-up a medical pipeline system along with their routine maintenance requirements. Basic repairs and troubleshooting techniques are covered on all components that are directly connected to the medical pipelines (e.g. source equipment, warning system, valves, and user terminals). Applicants must be actively engaged in the maintenance of medical pipeline systems and must have at least one (1) year of experience in the maintenance of medical pipeline systems.
